

Sarah Abdulmaleek Quwaidi

Data Analyst | Excel • Power BI • SQL • Python

+966 509450838 sarah.quwaidi1@gmail.com Sarah Quwaidi Makkah, Saudi Arabia

CAREER OBJECTIVE

Detail-oriented Data Analyst with a question-first approach to separating the signal from the noise. Skilled in Excel, Power BI, SQL, and Python, with hands-on experience building end-to-end projects processing up to 1M records. Seeking to help teams translate complex datasets into intuitive, actionable insights through user-centric dashboards.

EDUCATION

Bachelor of Computer Science – College of Computing, 08/2021 – 03/2025
Umm Al-Qura University Makkah, SA

- **Major:** Computer Science
- **Grade:** Excellent with First Honors (GPA: 3.99 of 4.00)
- **Relevant Coursework:** Statistics and Probability, Database, Data Structures, User Interface Design, and Artificial Intelligence

EXTRACURRICULAR ACTIVITIES

Volunteer, 5th National Conference for Computer Colleges – Umm Al-Qura University 12/2022

- Translated complex cybersecurity and data protection concepts into clear, accessible insights for diverse conference attendees.
- Managed an interactive awareness booth to educate visitors on information security best practices and safeguarding digital assets.

COURSES & CERTIFICATES

Data Analysis Professional Diploma, Tech Mind 06/2026

Data Analysis Bootcamp , Hash Plus 02/2026

Python for Data Science, AI & Development , IBM - Coursera 07/2024

SKILLS

Technical Skills:

- Analysis: Excel (LOOKUPS, Pivot Tables, Power Query).
- Databases & Querying: SQL (Advanced Joins, Window Functions).
- Programming: Python (Pandas, Numpy, Matplotlib, Seaborn).
- Visualization: Power BI, Tableau, Excel Dashboards.
- Data Modeling: Star Schema, ETL Fundamentals.

Personal Skills:

Problem Solving | Teamwork | Self-learning and devolping | Time Managment | Collaborative | Storytelling with data

PROJECTS

Pizza Sales Analysis – SQL & Power BI 05/2026

- Answered 20 business questions using SQL queries on a pizza restaurant dataset, then exported key results as views into Power BI for visualization.
- Tools: SQL, Power BI
- Outcome: Identified peak revenue hours, best and worst sellers by category, and ordering trends supporting staffing and inventory decisions.

(Jumia) Retail Sales Analysis – Power BI 04/2026

- Built a 3-page interactive dashboard analyzing \$2.3M in sales across 4 years, 4 customer segments, and 3 product categories.
- Tools: Power BI, Power Query, DAX, Data Modeling.
- Outcome: Resolved Many-to-Many issues using a composite key and bridge table. Found that discounts above 30% push margins negative, leading to a pricing cap recommendation.

- Processed 12 monthly CSV files (~1M records) via Power Query, built a Star Schema in Power Pivot with custom DAX measures.
- Tools: Excel (Power Query, Power Pivot, DAX).
- Outcome: Uncovered a 15% shipping cost gap in southern routes and identified top 10 carriers out of 180+, supporting cost optimization.
